SAURABH SHUKLA

Full Stack Developer • React • Node.js • MongoDB • PostgreSQL

saurabhshukla8983@gmail.com • +91 8569879142 • LinkedIn • GitHub • Portfolio • LeetCode

PROFESSIONAL SUMMARY

Software developer with hands-on experience building full-stack web applications using React, Node.js, and MongoDB. Skilled in production-style backend architecture, role-based dashboards, and secure REST APIs. Experienced with AI-assisted development workflows using Windsurf and Claude. Seeking a junior software developer role to contribute to high-impact products and grow within a collaborative engineering team.

TECHNICAL SKILLS

Languages JavaScript, TypeScript, Java, C, SQL
Frontend React.js, Tailwind CSS, Radix UI, HTML5, CSS3
Backend Node.js, Express.js, Supabase Edge Functions (Deno/TypeScript)
Databases PostgreSQL, MongoDB, Supabase (Realtime + RLS)
Tools Git, GitHub, REST APIs, Postman, WebRTC, Vercel, AI-assisted dev (Windsurf, Claude)

EXPERIENCE

Bluestock Fintech — Software Developer Intern July 2025 – September 2025

- Built a web-based IPO listing platform using React and Express with modular UI and REST APIs.
- Integrated frontend with backend APIs and optimized database queries, reducing API response time by ~30%.
- Implemented reusable UI components and structured backend routing for scalability.
- Improved input validation and error handling across the application.

VIBE CODED PROJECTS

AI-assisted projects built with Windsurf (Antigravity) + Claude AI — rapid full-product development.

MockMate — Peer Interview Practice Platform GitHub • Live

⚡ *Vibe Coded using **Windsurf (Antigravity)** + **Claude AI (Anthropic)***

- Built a real-time peer-to-peer mock interview platform with smart matchmaking, WebRTC video calling, and session management — designed end-to-end using an AI-first workflow with Claude as technical co-pilot and Windsurf for code generation.
- Implemented a queue-based peer matchmaking Edge Function (Deno/TypeScript) with FIFO logic, experience-level compatibility filtering (beginner ↔ intermediate ↔ advanced), and 10-minute TTL — successfully powering 8 live sessions across 3 registered users.
- Built WebRTC video calling using browser-native RTCPeerConnection with Supabase Realtime as the signaling channel (SDP offer/answer + ICE candidates stored in PostgreSQL) — no third-party video SDK required.
- Designed a normalized PostgreSQL schema with Row Level Security across 6 tables: profiles, sessions, match_queue, quiz_attempts, user_roles — with Realtime replication enabled for live signaling.
- Integrated Elo rating system (base 1200) for post-session skill tracking across 12+ tech domains: DSA, System Design, React, ML, DevOps, and more.

***Tech:** React 18 · TypeScript · Vite · Tailwind CSS · shadcn/ui · Supabase (Auth + Postgres + Realtime + Edge Functions) · WebRTC · React Router · TanStack Query · Vercel*

SmartServe — Service Marketplace GitHub • Live

⚡ *Vibe Coded using **Windsurf (Antigravity)** + **Claude AI (Anthropic)***

- Built a full-stack service marketplace using React, Node.js, and PostgreSQL with role-based dashboards for users and service providers — vibe coded using Windsurf + Claude for rapid UI scaffolding and backend routing.
- Implemented booking workflows, service management, and review systems backed by secure REST APIs with JWT-based authentication.
- Added search and filter features for intuitive service discovery. Deployed to a production-ready environment with a live demo accessible online.

***Tech:** React · Node.js · Express · PostgreSQL · JWT · Tailwind CSS · Vercel*

PROJECTS

MERN Stack Backend Authentication System GitHub • Live

- Developed a robust authentication system using MongoDB, Express, and Node.js with secure user registration and login.
- Implemented password hashing using Bcrypt and session management using JSON Web Tokens (JWT) with protected middleware routes.
- Integrated comprehensive error handling and input validation for secure API communication.

***Tech:** Node.js · Express · MongoDB · Bcrypt · JWT · REST APIs*

URL Shortener GitHub• Live

- Built a full-stack URL shortening service with custom alias support, click tracking, and redirect management.
- Implemented RESTful API endpoints for URL creation, retrieval, and analytics with MongoDB as the data store.
- Designed a clean frontend interface for generating and managing short links with real-time stats.

Tech: *Node.js · Express · MongoDB · React · REST APIs*

EDUCATION

B.Tech — Computer Science & Engineering 2022–Present | CGPA: 7.01/10
Class XII — CBSE 2022 | 89.4%
Class X — CBSE 2020 | 82.8%

CERTIFICATIONS

- freeCodeCamp — Back End Development and APIs
- NPTEL — Cloud Computing
